

Renewable Energy

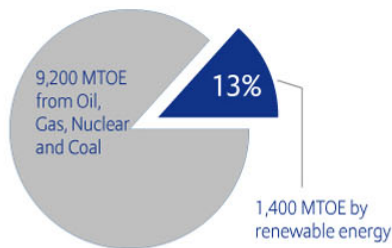

Projections of Global Renewable Energy Usage

IEA Reference Scenario – Business as Usual

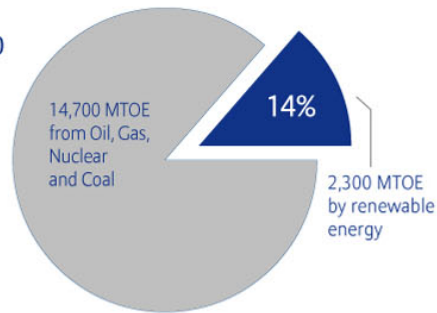

The International Energy Agency (IEA) projects that if present government policies continue, the share of renewable energy sources in the overall energy mix will only grow by one percent until 2030.

MTOE: Mega Tons of Oil Equivalent

IEA Alternative Scenario – The Effect of Bold Climate Policies

If governments implement bold climate policies, the share of renewable energy sources at the global energy mix could be significantly higher by 2030.
